

## Apprenticeship Program

### About Us

DigitalCrafts is the top-rated Accelerated Learning Program (more affectionately known as a "coding bootcamp") in Atlanta and Houston. Our flagship course is a 16-Week Immersive Bootcamp, which includes over 640 hours of instruction in full-stack web development from industry experts. Many of our students also enroll in our rotating evening electives, which add an additional 25 hours of instruction on complimentary topics like UX Design, Cross-platform Mobile Development, native iOS Development, and Computer Science Principals.

### Employer Network

*"No obligations, no cost, just talent."*

Joining our Employer Network grants access to an extremely motivated group of talented developers at no cost. As a member of our Employer Network, we'll keep you abreast of our top graduates as they finish our program and enter the workforce. You'll receive student portfolios for each cohort, as well as an invitation to our periodic Graduation "Demo" Parties, where you can meet our graduates as they walk you through their portfolio projects. [RSVP Online](#)

### Apprenticeship Program Details

We are always looking for employers who want to be more involved. To that end, we also offer the DigitalCrafts Apprenticeship Program. The details are up to you, but an apprenticeship typically involves:

*10 to 40 hours per week*

*\$10 per hour minimum*

*4-week commitment or longer*

There is no obligation to hire an apprentice full-time, but this is a great opportunity to consistently evaluate new talent in a competitive labor market. If you select a student before they graduate from our program, you also may have an opportunity to influence their final project; if the student agrees, we'll work with them for the final 2-3 weeks incorporating the skills you need, essentially providing free training for your next great hire!
